Safety Data Sheet

Product Name: PALMOLIVE HAND SANITISER - FIG AND COCONUT

1. Identification

GHS Identifier

PALMOLIVE HAND SANITISER - FIG AND COCONUT

Product Code

B0662S180001

Company Name

Colgate-Palmolive Pty Ltd (ABN 002 792 163)

Address

Australia: Level 14, 345 George Street, Sydney
NSW 2000 Australia

Telephone/Fax Number

Tel: AUS (02) 9229 5600 NZ: 04 576 6700
Fax: AUS (02) 9229 5700, NZ: 04 568 8835

Emergency phone number

AUS 1800 638 556, NZ: 0800 764766

Recommended use of the chemical and restrictions on use

Leave on hand sanitiser

Other Information

New Zealand Address: Level 4, 45 Knights Road, Lower Hutt.

2. Hazard Identification

Classification of the substance or mixture

Classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.

Classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition).

Flammable Liquids: Category 2

Signal Word(s)

DANGER

Hazard Statement (s)

H225 Highly flammable liquid and vapour.

Pictogram (s)

Flame

Precautionary statement – Prevention

P103 Read label before use.

P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

P241 Use explosion-proof electrical/ventilating/lighting/equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

Precautionary statement – Response

P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P370+P397 In case of fire: Use carbon dioxide, dry chemical, foam, water fog or water mist for extinction.

P403+P235 Store in a well-ventilated place. Keep cool.

Precautionary statement – Storage

P501 In the case of a substance that is in compliance with a HSNO approval other than a Part 6A (Group Standards) approval, a label must provide a description of one or more appropriate and achievable methods for the disposal of a substance in accordance with the Hazardous Substances (Disposal) Regulations 2001. This may also include any method of disposal that must be avoided. See Section 13 for disposal details.

Safety Data Sheet

Product Name: PALMOLIVE HAND SANITISER - FIG AND COCONUT

Ingredients determined not to be hazardous, including water.

4. First-aid measures

**Inhalation**
If inhaled, remove affected person from contaminated area. Keep at rest until recovered. If symptoms develop and/or persist seek medical attention.

**Ingestion**
Do not induce vomiting. Wash out mouth thoroughly with water. Seek medical attention.

**Skin**
If irritation develops, discontinue use. Seek medical attention.

**Eye contact**
If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove contact lenses. Continue flushing for several minutes until all contaminants are washed out completely. If symptoms develop, seek medical attention.

**First Aid Facilities**
Eyewash and normal washroom facilities.

**Advice to Doctor**
For advice in an emergency, contact a Poisons Information Centre (Phone Australia 131 126; New Zealand 0800 POISON / 0800 764 766) or a doctor at once.

5. Fire-fighting measures

**Suitable extinguishing media**
Use carbon dioxide, dry chemical, foam, water fog or water mist. Alcohol resistant foam is preferred. If not available fine water spray/mist can be used.

**Unsuitable Extinguishing Media**
Do not use water jet.

**Hazardous Combustion Products**
Highly flammable liquid and vapour. Vapour/air mixtures may ignite explosively. Flashback along the vapour trail may occur. Runoff to sewer may create fire or explosion hazard.

Specific hazards arising from the chemical
• 2YE

**Hazchem Code**
Not available

**Decomposition Temp.**
Fire fighters should wear full protective clothing and self-contained breathing apparatus (SCBA) operated in positive pressure mode. In case of fire the product may be violently or explosively reactive. Use water spray to disperse vapours. This product should be prevented from entering drains and watercourses.

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**
Wear appropriate personal protective equipment and clothing to prevent exposure. Extinguish or remove all sources of ignition and stop leak if safe to do so. Increase ventilation. Evacuate all unprotected personnel. If possible contain the spill. Spillage can be slippery. Place inert absorbent, non-combustible material onto spillage. Use clean non-sparking tools to collect the material and place into suitable labelled containers for subsequent recycling or disposal. Dispose of waste according to the applicable local and national regulations. If contamination of sewers or waterways occurs inform the local water and waste management authorities in accordance with local regulations.

7. Handling and storage

**Precautions for Safe Handling**
Follow instructions on label. Wear appropriate personal protective equipment and clothing to prevent exposure. Have emergency equipment (for fires, spills, leaks, etc.) readily available. Work from suitable, labelled, fire-resistant containers. Open containers carefully as they may be under pressure. Keep containers tightly closed. Flameproof equipment is necessary in areas where the product is being used. Take precautionary measures against static discharges. Barth or bond all equipment. Do not empty into drains. Ensure a high level of personal hygiene is maintained when using this product, that is, always wash hands before eating, drinking, smoking or using the toilet facilities.

**Conditions for safe storage, including any incompatibilities**
Store in a cool, dry, well-ventilated area away from sources of ignition, oxidising agents, strong acids, foodstuffs, and clothing. Keep containers closed when not in use, securely sealed and protected against physical damage. Inspect regularly for deficiencies such as damage or leaks. Have appropriate...
8. Exposure controls/personal protection

No exposure standards have been established for this material by Safe Work, Australia. However, over-exposure to some chemicals may result in enhancement of pre-existing adverse medical conditions and/or allergic reactions and should be kept to the least possible levels. The available exposure limits for ingredients are listed below:

<table>
<thead>
<tr>
<th>Substance</th>
<th>TWA</th>
<th>STEL</th>
<th>NOTICES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ethanol</td>
<td>1000</td>
<td>1880</td>
<td></td>
</tr>
</tbody>
</table>

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.

STEL (Short Term Exposure Limit): The average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

No biological limits allocated

Appropriate engineering controls

Not required under normal conditions of use.

Respiratory Protection

For industrial applications: An approved respirator with a replaceable mist filter should be used. Reference should be made to Australian/New Zealand Standards AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.

Eye Protection

For industrial applications: Safety glasses with side shields or chemical goggles should be worn. Final choice of appropriate eye/face protection will vary according to individual circumstances. Eye protection devices should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.

Hand Protection

Not required under normal conditions of use.

For industrial applications: Wear gloves of impervious material. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.

Body Protection

No special clothing required under normal conditions of use.

For industrial applications: Suitable protective work wear, e.g. cotton overalls buttoned at neck and wrist is recommended. Chemical resistant apron is recommended where large quantities are handled.

9. Physical and chemical properties

Appearance: Brown liquid with blue beads

Colour: Brown

Odour: Characteristic

Decomposition: Not available

Temperature

Melting Point: Not available

Boiling Point: Not available

Solubility in Water: Not available

pH: 7.5 (25°C, 1% solution)

Vapour Pressure: Not available

Vapour Density (Air=1): Not available
Palmolive Hand Sanitiser - Fig and Coconut

Classified as hazardous

Evaporation Rate: Not available
Odour Threshold: Not available
Viscosity: 7,000 cPs (25°C)
Partition Coefficient: Not available
Density: Not available
Flash Point: 14°C
Flammability: Highly flammable
Auto-Ignition Temperature: Not available
Flammable Limits - Lower: Not available
Flammable Limits - Upper: Not available

10. Stability and reactivity
Reactivity: Reacts with incompatibles.
Chemical Stability: Stable under normal conditions of storage and handling.
Conditions to Avoid: Heat, open flames and other sources of ignition.
Incompatible Materials: Strong oxidizing agents.
Hazardous Decomposition Products: Thermal decomposition may result in the release of toxic and/or irritating fumes, smoke and gases including carbon monoxide and carbon dioxide.

11. Toxicological Information
Toxicity Information: No toxicity data available for this material.
Ingestion: Ingestion of this product may irritate the gastric tract causing nausea and vomiting.
Inhalation: Inhalation of product vapours may cause irritation of the nose, throat and respiratory system.
Skin: May cause mild skin irritation in some sensitive individuals.
Eye: May be irritating to eyes. The symptoms can include redness, itching and tearing.
Respiratory Sensitisation: Not expected to be a respiratory sensitiser.
Skin Sensitisation: Not expected to be a skin sensitiser.
Germ Cell Mutagenicity: Not considered to be a mutagenic hazard.
Carcinogenicity: Not considered to be a carcinogenic hazard.
Reproductive Toxicity: Not considered to be toxic to reproduction.
STOT - Single Exposure: Not expected to cause toxicity to a specific target organ.
STOT - Repeated Exposure: Not expected to cause toxicity to a specific target organ.
Aspiration Hazard: Not expected to be an aspiration hazard.

12. Ecological Information
Ecotoxicity: No ecological data available for this material.
Persistence and Degradability: Not available
Mobility: Not available
Bioaccumulative Potential: Not available
Environmental Protection: Prevent this material entering waterways, drains and sewers.
13. Disposal considerations

Dispose of waste according to applicable local and national regulations. Labels should not be removed from containers until they have been cleaned. Do not cut, puncture or weld on or near containers. Empty containers may contain flammable residues. Contaminated containers must not be treated as household waste. Containers should be cleaned by appropriate methods and then re-used or disposed of by landfill or incineration as appropriate. Do not incinerate closed containers. Advise flammable nature.

14. Transport information

This material is a Class 3 - Flammable Liquid according to The Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Class 3 - Flammable Liquids are incompatible in a placard load with any of the following:
- Class 1, Explosives
- Division 2.1, Flammable Gases, (Division 2.1 and Class 3 are incompatible in transport if both are in tanks or other receptacles with a capacity individually exceeding 500 L.)
- Division 2.3, Toxic Gases
- Division 4.2 Spontaneously Combustible Substances
- Division 5.1 Oxidising Agents and Division 5.2, Organic Peroxides
- Class 6 Toxic or Infectious Substances (where the flammable liquid is nitromethane)
- Class 7: Radioactive materials unless specifically exempted

Marine Transport (IMO/IMDG):
Classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.
UN No.: 1170
Proper Shipping Name: ETHANOL
Class: 3
Packaging Group: II
EMS No.: F-E, S-D
Special Provision(s): 144

Air Transport (ICAO/IATA):
Classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.
UN No.: 1170
Proper Shipping Name: Ethanol
Class: 3
Packaging Group: II
Label: Flammable liquid
Packaging Instructions (passenger & cargo): 353
Packaging Instructions (cargo only): 364
Special Provision(s): A3 A58 A180

U.N. Number
1170

UN proper shipping name
ETHANOL (ETHYL ALCOHOL)

Transport hazard class(es)
3

Hazchem Code
\[2YE\]

Packing Group
II

EPG Number
3A1

IERG Number
14

IMDG Marine pollutant
No

15. Regulatory information

Classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.
Not classified as a Scheduled Poison according to the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP)

Poisons Schedule
Not Scheduled
16. Other Information

Date of preparation or last revision of SDS: SDS Created: November 2013
